## **New McCarran International Airport Website Takes Off Visitors to find fresh look and improved functionality at [www.mccarran.com](http://www.mccarran.com)**

LAS VEGAS – McCarran International Airport, the eighth-busiest airport in North America and the aviation gateway to Southern Nevada, has updated its website with a clean, modern look and new user-friendly features.

Those visiting [www.mccarran.com](http://www.mccarran.com) will now find a site that is:

### **Mobile Friendly**

With this new design, McCarran offers travelers a more mobile friendly experience. The responsive website will now adjust its layout to multiple screen sizes to maximize its appearance on the variety of mobile devices, from cell phones to tablets, used by travelers on the go.

### **Easily Navigated**

Site navigation has been enhanced with multiple paths and additional pages to help travelers find what they need, such as airline-specific pages with airport information of interest to their respective passengers. Dining and shopping options are presented in multiple formats, from a comprehensive listing to concourse maps, and from the homepage visitors can search for flight information by city, airline or flight number.

### **More Accessible for Those Who Require Special Assistance**

The redesign of [mccarran.com](http://mccarran.com) addresses accessibility on two fronts. First, an expanded amount of information is provided to those who need special assistance or would like to learn about the airport's efforts to make its facilities accessible to all travelers. Second, the design team worked to reformat the website in a way that makes content more accessible for website visitors who utilize translator and text-to-speak features. Content is available in 10 different languages with just a click of a button.

### **Highlighting Opportunities to Join the McCarran Team**

Both the "Careers" and "Doing Business" portions of the website have been updated for those interested in working at McCarran, be it by joining the Department of Aviation team or through opportunities to do business with or at the airport. Also under "Doing Business," users will find Department of Aviation press releases, financial reports, scheduled flights into the market and other statistics.

The web design team, comprised of members from the Department of Aviation's Information Systems and Public Affairs & Marketing divisions, also recently overhauled the websites for other airports owned and operated by Clark County, such as North Las Vegas Airport and Henderson Executive Airport.
